**CONVENTION LOCATION**
Pasadena Convention Center  
300 E. Green Street, Pasadena, CA 91101

**CONVENTION PARKING**
Parking at Pasadena Convention Center, On-site Parking: 600 spaces.
Two Entrances: Marengo Avenue to the west and Euclid Avenue to the east between Green Street and Cordova. Parking Cost: **$12 a day** for up to 16 hours; **$18 a day** for in-and-out privileges (subject to change) Parking at Pasadena Convention Center

**BOB HOPE BURBANK AIRPORT**
The closest airport to Pasadena is the Bob Hope (Burbank) Airport. (Around 15 miles away.) Southwest has frequent flights from Sacramento, San Francisco, San Jose, and Oakland.

**GETTING HERE**
The Pasadena Convention Center from Burbank airport is $25 by shuttle (you will need to book ahead of time). The same shuttle services that serve LAX also serve Burbank, approximately $55 by taxi, and approximately $30 by Uber or Lyft. (Note, however that although Uber/Lyft can drop you at the Burbank airport’s curb, you need to arrange to pick up Uber in the airport’s short term parking lot and the parking fee will add a little on to your fare.)

**SUPERSHUTTLE:**
http://www.supershuttle.com/  
(800) BLUE-VAN (800-258-3826)

**LYFT & UBER**
If you are familiar with Lyft and Uber, all you need to do is book a ride using Lyft or Uber’s app, which can be downloaded at the App Store or Google Play. Fares vary so be sure to check each carrier.  
Lyft: https://www.lyft.com/  
Uber: https://www.uber.com/

**METRO RAIL**
Metro Rail is Los Angeles’s light rail system that can take passengers from Pasadena to the airport in less than half an hour. Trains run every 10-15 minutes, but it is highly recommended that you leave yourself plenty of travel time to get to your destination.  
For more information about the Metro Rail: http://www.metro.net/

**PASADENA**
A dynamic city centered in beautiful Southern California, Pasadena is a city of discovery – from dining and shopping to theater and art galleries. Pasadena offers the business and recreational traveler a surprising combination of sophisticated charm, culture, history, and fun. 
Pasadena is located less than 10 miles north of downtown Los Angeles and just minutes from Universal Studios and Hollywood. With 10 hotels and 5 motels, this pedestrian-friendly city is home to 500 restaurants and hundreds of national retailers and boutiques. 
Pasadena is filled with remarkable art collections, architecture, innovation, and entertainment. Whether you are attending just one day or the entire convention, there are plenty of different options and opportunities to explore the city of Pasadena. Here are some suggested itineraries to help you create a uniquely Pasadena experience.

**ARCHITECTURAL TREASURES**
With 16 historical districts packed into 23 square miles, Pasadena has a wealth of incredible architecture to discover. Take a crash course in architectural style by visiting the city’s cultural and academic institutions, where you’ll see everything from Beaux Arts to Northern Chinese Imperialist. When dining or shopping, you’ll find yourself in a noteworthy structure guaranteed to enhance the experience.  
http://www.visitpasadena.com/architectural-treasures/

**MEMORABLE MUSEUMS**
Pasadena is known for its abundance of renowned cultural institutions, many within walking distance of one another.  
http://www.visitpasadena.com/memorable-museums/

**SHOPPING EXCURSIONS**
Find unique treasures and exceptional bargains at retailers ranging from exclusive boutiques and national department stores to flea markets and quaint antique shops.  
http://www.visitpasadena.com/itinerary/shopping-excursions/

**MAPS & DIRECTIONS**
Pasadena is an invitingly walkable community and features a smart, streamlined transit system. Shuttles, buses, and light rail can take you anywhere in the city and to landmarks in the greater Los Angeles area. And don’t forget four regional airports service visitors to Pasadena daily. Get around Pasadena and neighboring areas trouble-free, thanks to transit options.

Changing Lives Through Communication
WELLNESS
AT CSHA 2019

Track Your Steps: Did you meet your daily step goals? Experts advise taking 10,000 steps a day! Use your phone or another step-tracking device to count your steps. The benefits of walking include lower blood pressure and cholesterol; increased energy; improved sleep; stress relief; stronger heart, muscles and bones; and improved balance and quality of life and steps can really add up. You will be surprised how many daily steps you take while at CSHA!

Hydrate: Bring your own bottle and drink plenty of water to keep you energized and focused for the learning and networking opportunities. There are water fountains located throughout the Pasadena Convention Center if you need to refill.

Get Outside and Get Fresh Air: Fresh air makes you happier and strengthens your immune system! Be sure to wander around beautiful Pasadena and enjoy the sights.

Connect: Rather than taking in as much as possible, take in as much as is meaningful. Spend time building a handful of real connections with other attendees. Making fewer but more meaningful connections can help ease the social overwhelm that can happen at conventions. Set a goal of turning the attendees into your real-life LinkedIn network.

Rest and Reflect: For those of you staying at a nearby hotel, it will be convenient for you to go back to your room to recharge when needed. When you’re winding down for bed, try writing down a few key takeaways from the day. Not only is reflection good for the learning process, it is also good for your health. A clear mind can help you sleep well and wake up recharged for another exciting day!
Thank you to all of our 2019 Convention Sponsors! The success of our annual convention would not be possible without your generous support.

**ADA:** Two chairs will be designated for ADA seating in each meeting room with chair covers. The chair covers are not to be removed. The ADA designated seating will be in front of the presenter for persons with a hearing impairment and in front of the screen for persons with a visual impairment. We will also have space for a wheelchair or other mobility aid. CSHA designates ADA seating is prioritized for persons with a disability, and that an attendee who has a sticker has priority to sit in the designated seating.

**ATTIRE:** Business casual attire is recommended during the Convention. Session rooms are often cool, and attendees are advised to dress in layers. Comfortable walking shoes are strongly recommended.

**CONFERENCE ASSISTANCE:** Should you need assistance during the conference, please stop by the registration desk. Lost and found will be located there.

**COURSE SYMBOLS:** SC = Short Course, MS = Miniseminar, CEU = Continuing Education Unit (ASHA), PS = Poster Session, SR = Student Research.

**ELECTRONIC DEVICE COURTESY:** Please be considerate of the speakers and other attendees and turn off or silence your cell phones and other electronic devices. Disruptive attendees may be asked to leave conference sessions.

**EVALUATIONS:** Your views and opinions are important to CSHA and assist us with planning future conferences. CSHA attendees will be emailed a short evaluation survey the week after the conference. Please make sure to check your inbox and let us know how you enjoyed CSHA 2019!

**EXHIBIT HALL OPENING RECEPTION, STUDENT LUNCHEON, CELEBRATION OF EXCELLENCE, SLPA LUNCHEON, KNOWLEDGE BOWL RECEPTION.** Luncheons require a separate check-in at the door and payment at registration.

**GUEST BADGE:** A guest badge may be purchased for $50. This is for a spouse or “accompanying person” who is not in the profession. The guest badge will allow a guest to attend the association’s social events and the exhibit area. It will NOT allow guests to attend other convention presentations. Guests attending any ticketed, social, or food functions that require fees must pay for these functions.

**KEYNOTE SESSION:** All attendees are invited to attend the Opening Session on Friday, March 15, 2019.

**LACTATION ROOM:** Will be available for nursing mothers in at the Pasadena Conference Center Room 215, located on the second floor.

**NAME BADGES:** Please wear your name badge at all times, as it is required for entrance to all conference functions, including the Exhibit Hall. For security reasons, all conference functions require registration and a name badge. Session monitors and Exhibit Hall security guards will be checking for badges.

**OVERCROWDING OF MEETING ROOMS:** Extensive planning goes into scheduling sessions in appropriately sized rooms, however, the popularity of sessions is not always predictable, and overcrowding occasionally occurs. If a session room reaches capacity, attendees must follow the instructions provided by CSHA staff, Convention Center Security and staff, or student volunteers. Attendee may be instructed not to stand against the walls or block the aisles or doors, or they may be denied entry if the room is too crowded. Please be courteous and respectful to staff and or volunteers if you are instructed to attend another workshop.
PHOTOGRAPHY, AUDIO/VIDEO RECORDING POLICY: On occasion, a CSHA photographer may take photos of participants in conference functions or activities. Please be aware these photos are for CSHA use only and may appear in future conference programs, catalogs, brochures, or other promotional materials. Your attendance constitutes your permission and consent for this photography. Please note that photography and audio/video recording by attendees are not allowed inside session rooms.

QUIET ROOM: A quiet room will be available at the convention center, Room 209. Quiet rooms are intended to provide a quiet, calm space where convention attendees can spend time away from noise. The quiet room is not available for conversations or meetings.

RECEIPTS AND CERTIFICATES OF COMPLETION: All attendees who register will receive a receipt/confirmation via e-mail upon completion of the registration and payment process. Certificates of completion are available to all attendees. You must complete the online CEU/attendance reporting process, to retrieve your certificate. Once you have completed this process, you will be able to print your certificate.

REFUND POLICY: Requests for refunds must be sent to CSHA prior to the pre-registration deadline. A $25 administrative fee will be deducted. No refunds will be granted after the pre-registration deadline.

REGISTRATION: At the Pasadena Convention Center, pick up your name badge, on-site convention program and convention tote.

SOCIAL MEDIA POLICY: CSHA encourages the use of social media, including blogging, at the CSHA Convention as a way for attendees to summarize, highlight, and promote presentations or share their thoughts on their experiences in general, provided that presentation content and materials are not shared in full and that authors or presenters are referenced and cited wither appropriate. Please keep in mind that presenters hold the intellectual property rights and copyrights to their materials.

SPEAKERS: All presenters should pick up their program materials two hours prior to their presentation at the registration desk located in the registration area at the Pasadena Convention Center.

SPONSORS: CSHA thanks it sponsors. Sponsors are not responsible for the content of this convention, or does CSHA endorse their products or services.

STATE LICENSE CE HOURS: One contact hour equals (1) licensing CE hour. Short course 3 hours Mini-seminar 1.5 hours

WORKSHOPS: Courses are available on a first come, first served basis. Please arrive at least 15 minutes early to ensure you get a seat. Courses have limited seating and may fill up. Plan an alternative in the event your preferred course is full.

Complimentary Events

Exhibit Hall Opening Reception
▶ Thursday, March 14, 2019 | 5:00 – 7:00 pm | Exhibit Hall A
The Exhibit Hall opens with a ribbon-cutting ceremony and light refreshments throughout the exhibit hall, giving exhibitors and attendees their first chance to network. This upbeat reception provides dedicated time to check out the exhibiting companies.

Keynote Presentation with Kristin Wright
Friday, March 15, 2019 | 8:00 – 9:30 am | Ballroom D&E
Earn 1.5 CE hours/ 0.15 ASHA CEUs
Kristin Wright
Director of Special Education Division, California Department of Education
Kristin Wright is the California State Director of Special Education. Kristin brings a wealth of professional and personal experience to this leadership position as a policy expert, advocate, teacher, and mother of a child with significant physical and intellectual disabilities. After earning a bachelor’s degree in sociology from California State University, Sacramento, she later returned to higher education to earn an Education Specialist teaching credential and a master’s degree in special education. She has spent more than a decade working in education policy and programs with a focus on special education.

Legislative Issues Information Table
▶ Friday, March 15, 2019 | 9:30 - 2:00 pm | Across from registration area
Drop by anytime to discuss legislative and policy issues with CSHA legislative committee chair Bob McKinney and CSHA legislative advocates Abe Hajela & Caitlin Jung (Capitol Advisors Group).

Celebration of Excellence and District Awards Ceremonies
▶ Friday, March 15, 2019 | Ballroom D&E
This complimentary event is open to all convention attendees.
4:30 pm – 5:00 pm Doors Open
5:00 pm – 6:00 pm Awards Ceremony
6:00 pm – 6:30 pm Reception: Join us for appetizers and a no-host bar. Come as casual or as formal as you would like!
6:30 pm – 7:30 pm District Award Ceremonies: see page 19

State-Wide Award Recipients
ADULT DISTINGUISHED CONSUMER OF THE YEAR:
Jeff Adelman

CHILD DISTINGUISHED CONSUMER OF THE YEAR:
Cody Pate

DISTINGUISHED ACHIEVEMENT:
Anna Krajcin

PUBLIC SERVICE:
Center for Accessible Technology
Celebration of Excellence and District Awards Ceremonies (Continued)

Friday, March 15, 2019 | 6:30 – 7:30 pm  (meeting room locations are listed below)

District Award Recipients

**DISTRICT 1 | Room 102**
- Isabel Craik  
  Outstanding Student Award
- Maret Wilson  
  Outstanding Achievement

**DISTRICT 2 | Room 103**
- Maram Abed  
  Outstanding Student
- Alicia Ansley  
  Outstanding SLPA
- Joseph Arata  
  Outstanding Service
- Angelina Brewer  
  Outstanding Student
- James Chuchas  
  Outstanding Leadership
- Margaret Crawford  
  Outstanding Service
- Natalie Crum  
  Outstanding Student
- Cynthia Starkey  
  Outstanding Achievement
- Ashley Stone  
  Student Legislative Advocacy Commendation

**DISTRICT 3 | Room 102**
- Margaret Beck  
  Outstanding Service Award
- Laura Cook  
  Outstanding Achievement Award
- Tricia Dausses  
  Outstanding Leadership Award
- Cruz Gonzalez  
  Outstanding SLPA Student Award - Delta College
- Natalie Miller  
  Outstanding Student Award - University of the Pacific
- Elisa Thurman  
  Outstanding Student Award - California State University, East Bay

**DISTRICT 4 | Room 104**
- Mary “Francie” Arboleda  
  Outstanding Student
- Leah Huang  
  Outstanding Service
- Marcella McCollum  
  Outstanding Service

**DISTRICT 5 | Room 104**
- Madelyn De Fede  
  Outstanding Student
- Gina Rotondo  
  Outstanding Leadership

**DISTRICT 6 | Room 107**
- Kyle Epps  
  Outstanding Service
- Kristin Ladd

**CSHA Knowledge Bowl Reception**  
Saturday, March 16, 2019 | 5:00 – 5:30 pm  | Ballroom D Foyer

Open to all convention attendees!

No host bar and complimentary appetizers! We invite all convention attendees to join us for appetizers to end your day or to re-energize before cheering on your favorite Knowledge Bowl team!

---

**CSHA Knowledge Bowl**  
Saturday, March 16, 2019 | 5:30 – 7:00 pm  | Ballroom D

University teams comprised of top-notch SLP students (MS/MA level students only) will be given the opportunity to prepare for the PRAXIS examination through a fun game show format competition. This session is designed for students preparing to take the PRAXIS examination, as well as professors/instructors who would like to volunteer for the expert panel. Show your school spirit, cheer for your university team to win, and most importantly, prepare for the PRAXIS exam! Reimbursement for the PRAXIS exam will be awarded to each member of the winning team!

Watch or participate as the SLP students from the Universities battle it out through a friendly competition based on questions similar to the Praxis Exam. Wear your University’s colors, make signs, create cheers, and come support your team.

---

**Why Should I Attend?**
Earn 1.5 CE hours/ 0.15 ASHA CEUs

CSHA would like to thank the following sponsor for their generous support
Student Luncheon

> **Friday, March 15, 2019 | 11:30am – 1:00 pm | Justines Ballroom**

**Shari Robertson, Ph.D., CCC-SLP**  
ASHA President

**Put on Your Game Face and Get Ready to Play!**

2019 ASHA President will share opportunities to lead, learn, and get engaged on your journey to becoming an ASHA Certified SLP or Audiologist. Friendly competition and a few surprises? You have to get in the game to find out.

**$25 | Pre-registration only—no tickets sold on-site.**

SLPA Luncheon

> **Saturday, March 16, 2019 | 12:00pm – 1:30 pm | Justines Ballroom**

**SLPA Panel Presentation**  
Schools, Private Practice, AAC Specialist

**Megan Chais, Moderator**  
CSHA SLPA Director

**Gwen Harper, B.A.**  
Long Beach Unified School District

**Nicole Wilson –Friend, B.A.**  
Stockton Unified School District

**Celina Wright, B.S.**  
Wings Speech & Language Center

Panel presentation followed by Questions & Answer session, to facilitate dialogue and best practice among Speech Language Pathology Assistants.

**$25 | Pre-registration only—no tickets sold on-site.**

Ticketed Events

> **Friday, March 15, 2019 | 11:30am – 1:00 pm | Justines Ballroom**

> **Saturday, March 16, 2019 | 12:00pm – 1:30 pm | Justines Ballroom**

**$25 | Pre-registration only—no tickets sold on-site.**

Panel presentation followed by Questions & Answer session, to facilitate dialogue and best practice among Speech Language Pathology Assistants.

Affiliate Group Events

**CSUN Graduate Distance Learning Program, 20 Year Anniversary Reception**

> **Thursday, March 14, 2019 | 5:30 – 6:30 pm | Sheraton Justine’s Ballroom**

**Loma Linda University School of Allied Health Professions Alumni Breakfast**

> **Friday, March 15, 2019 | 7:00 – 8:30 am | Sheraton Cordova Room**

**UOP SLP Alumni & Friends Breakfast**

> **Saturday, March 16, 2019 | 7:00 – 8:15 am | Sheraton Justine’s Ballroom**

**San Jose State University Alumni Breakfast**

> **Saturday, March 16, 2019 | 7:00 – 8:30 am | Sheraton Piazza Ballroom**

**California State University, Northridge (CSUN) Alumni Luncheon**

> **Saturday, March 16 | 12:00 – 1:15 pm | Sheraton Magnolia Room**

**California State University, Fullerton Alumni Luncheon**

> **Saturday, March 16, 2019 | 12:00 – 1:30 pm | Sheraton Piazza Ballroom**
Exhibit Hall A

Thursday, March 14 | 5:00 pm – 7:00 pm
Friday, March 15 | 10:00 am – 5:00 pm
Saturday, March 16 | 9:00 am – 3:00 pm

Our Exhibit Hall features exhibiting companies presenting the latest products and services that you need to further your success. The career fair within the Exhibit Hall features companies and schools to help you advance your career. Companies that are participating in the career fair are highlighted. Stop by their booth with your resume to learn more about their job openings!

18  CSHA 2019 ANNUAL CONVENTION AND EXHIBITION | PASADENA, CA | MARCH 14-17, 2019
Speech-Language Pathology and Audiology Continuing Education Requirements for State License Renewal

Twenty-four hours of continuing education credits are required during the 24 month renewal cycle covered by your licensure. Each professional is individually responsible for tracking and maintaining proof of his or her own CE completion. The Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board enforces the CE requirement through random audits. In case of an audit, you should be prepared to provide documentation of your participation in the required number of CE activities. CSHA does maintain complimentary CSHA CE transcripts in the CSHA database.

Disclosure Information

The planners and speakers for this convention have disclosed if they have any financial or non-financial support that could have an effect on the content of the presentations in this activity. Disclosure statement summaries are available on CSHA’s website at https://www.csha.org/2019-Convention-Speaker-Disclosures

State Licensing Continuing Education Credit

This program meets the qualifications for a maximum of 25.5 hours of continuing professional development credit for Speech-Language Pathologists and Audiologists as required by the California Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board. CSHA/PDP-#1

ASHA Continuing Education Units

This course is offered for up to a maximum of 2.5 ASHA CEUs (Various levels; Professional area.)

An annual ASHA CE Registry fee is required to register ASHA CEUs. CE Registry fees are paid by the participant directly to the ASHA National office. The annual ASHA CE Registry fee allows registration of an unlimited number of ASHA CEUs for the calendar year. Contact the ASHA Action Center at (800) 498.2071 or for more information on the ASHA Action Center, please visit https://www.asha.org/ce/CEUs/

One hour of learning equals 0.1 ASHA CEU if you are a member of the ASHA Registry.

Courses That Do Not Qualify

Courses offered in this year’s program are approved for ASHA CEUs credit with the Exception of the following:

MS 33  |  MS 115

The California Speech-Language-Hearing Association is approved by the Continuing Education Board of the American Speech-Language-Hearing Association (ASHA) to provide continuing education activities in speech-language pathology and audiology. See course information for number of ASHA CEUs, instructional level and content area. ASHA CE Provider approval does not imply endorsement of course content, specific products or clinical procedures.
**CE Frequently Asked Questions**

1. **How do I get my CE Hours? Do I need to fill out the forms?**
   - Participants will report their CE hours online.
   - A CE Record (log sheet) has been provided for you in this program. Please use the CE Record form to keep track of your sessions.
   - As part of the online process, you will also need to submit:
     1. CSHA user account number
     2. State License number and expiration date
     3. ASHA number (only if you want ASAH credit)
     4. Three overall learning outcomes that you achieved (not per workshop).
     5. How you will apply what you learned in your professional setting
   - Shortly after the convention all participants will receive an internet link that they will use to report their CE hours.
   - Once you submit your workshops they will be stored in the CSHA database and, within 48 hours, you will receive instructions on how to access them. If you are a member of the ASHA CEU Registry, they will be shared with ASHA within 6-8 weeks.
   - You will receive an email with instructions on how to access your certificate.

2. **What if I don’t want to do it online? Can I still do a paper process?**
   - All CEUs must be reported using the online process. There is no longer a paper option.

3. **What about SLPAs (Speech-Language Pathology Assistants)?**
   - SLPAs are required to attend 12 hours of Continuing Education every 2 years
   - They will receive the same link as all the other participants and will complete the SLPA portion of the online form. They will then receive their certificate to keep as documentation of attendance.

4. **What if I am a CSHA member but not ASHA or visa-versa?**
   - The instructions for the online process will address this clearly.

5. **Do we get ASHA CEUs for the opening session/keynote presentation?**
   - Yes.

6. **What about poster sessions?**
   - Yes, you can get credit for attending Poster Sessions.
   - You need to spend a minimum of 15 minutes at each poster to get credit. For example, if you spend 15 minutes each at 6 different posters, it will be worth up to 1.5 hours of CEUs.
   - Record the posters you attend on the CE Record form along with your other sessions, then report them during the online process.

7. **What is the maximum amount of CEUs I can get at the convention. How do I do this?**
   - It is possible to earn up to 25.5 State CE hours or 2.55 ASHA CEUs at the convention.
   - You will need to attend the maximum number of sessions possible, PLUS the Knowledge Bowl Session, PLUS attend both poster session on Friday and Saturday for 1.5 hours of Poster Sessions (6 posters times 15 minutes each). There is enough time to do the Posters during “lunch breaks”.

8. **What if I leave a session early or want to attend 2 sessions that overlap?**
   - To get credit, all sessions must be attended in their entirety. You cannot get partial credit.

9. **When do I need to submit my CEUs?**
   - You must report all your convention continuing education activities by 11:59 PM PST on Tuesday, April 30, 2019.

Online CE Reporting Instructions: Complete instructions on entering your 2019 Convention CE hours will be emailed to you after the convention.

All records MUST be submitted by 11:59 PM (PST) on Tuesday, April 30, 2019.
**Building Culturally-Sustaining Supervisor/Supervisee Relationships in Graduate School**

**AUTHOR:** Amalia Hernandez, Ed.D., California State University, Monterey Bay

According to ASHA’s demographic data (2017), there continues to be an underrepresentation of SLPs from diverse backgrounds, with the majority of SLPs identifying as White (i.e., 92%) and monolingual (i.e., 93.5%). Within our graduate programs in California, our students are becoming more diverse which can produce cultural incongruency in the supervisor/supervisee relationship. In this session, major challenges will be addressed as well as some suggestions for creating culturally sustaining educational environments for our graduate students.

**INSTRUCTIONAL LEVEL:** Intermediate

---

**SAY-IT Naturelle: Preliminary Revision for the Fluency Development System for Young Children**

**AUTHORS:** Susan Fosnot, Ph.D., Chapman University
Erich Reiter, M.S., MGH Institute of Health Professions
Lukas Latacz, Ph.D., Vrije Universiteit Brussel, Brussels, Belgium

Have you ever thought whether an edutainment application, scientifically-based, and evidence-based practiced could be utilized in lieu of using picture cards, workbooks, and other forms of treatment? This mini-seminar will provide a model regarding how fluency skills can be practiced on a computer. A study was conducted at Camp Shout Out to test the efficacy of a gaming treatment app. Data will be presented on how campers improved their overall fluency.

**INSTRUCTIONAL LEVEL:** Advanced

---

**Face-to-Face (F2F) Concussion Education**

**AUTHOR:** Nancy Cohick, Ph.D., California State University, Los Angeles

Every year, millions of sports-related concussions occur-most sustained by 10 to 19 year olds. CA State law requires parent/athlete to sign a concussion information sheet. However, many likely sign without reading it. A face-to-face concussion program ensures that athletes hear the information going above the minimum requirements of the law-and thus may reduce athletes risk for greater harm. See the program and learn how you can implement it in your community or school district.

**INSTRUCTIONAL LEVEL:** Intermediate

---

**SLP Services for Children with ASD: Perspectives from Latino Emergent Bilingual Parents**

**AUTHORS:** Veronica Orozco, M.A., Pristine Rehab Care
Lei Sun, Ph.D., California State University, Long Beach

The presentation will discuss several factors that may prevent Latino families with limited English proficiency from accessing early intervention and special education services for their child with ASD. This study explored the perceptions of five Latino parents in the process of obtaining service and accessing exiting resources. The barriers they face as parents with LEP will also be discussed along with clinical implications.

**INSTRUCTIONAL LEVEL:** Beginner

---

**Critical Concepts in Head and Neck SLP Rehabilitation**

**AUTHORS:** Jeffrey Edwards, M.S., Stanford Healthcare
Jennifer Kizner, M.Ed., Stanford Healthcare

Patients treated for head and neck cancer can have difficulties with speech, swallowing and voice functions. These patients require evaluation and treatment from speech language pathologists specializing in head and neck physiology and neurology, and who understand the types of objective and patient reported evaluation tools required to effectively evaluate and make appropriate treatment plans. This session will focus on critical concepts for speech pathologists to feel competent working with this complex cancer patient population.

**INSTRUCTIONAL LEVEL:** Intermediate

---

**Coaching Communication Partners to Support Students who use AAC in Classroom Settings**

**AUTHORS:** Shubha Kashinath, Ph.D., California State University, East Bay
Elena Dukhovny, Ed.D., California State University, East Bay

Children in need of AAC rely on paraeducators to scaffold their AAC learning. Therefore, developing interventions that promote consistent use of AAC support strategies by paraeducators is vital for student success. While some paraeducator focused interventions exist, challenges remain with consistent implementation and generalization of such interventions. (Kent-Walsh & McNaughton, 2015). In this study, we evaluate the effects of paraeducator coaching on paraeducator use of AAC scaffolding strategies and on student communication outcomes.

**INSTRUCTIONAL LEVEL:** Intermediate
A Tiered Model of AAC Training for Providers in the School Setting

This session will describe a three-tiered training model to support the needs of complex communicators in school-based settings: Tier 1: AAC Foundations. For SLPS, SLPAs, Teachers, OTs, PTs, Behaviorists, School Psychologists, and Para educators. Tier 2: AAC Implementation. For SLPs and SLPAs. Tier 3: AAC Specialization. For Licensed SLPs. We will provide an overview of the development of the capacity building model we used based on evidence-based practices in the field of AAC.

INSTRUCTIONAL LEVEL: Intermediate

Cleft Palate, Craniofacial and Resonance Disorders: Treatment Strategies That Work!

AUTHORS: Julia Hobbs, M.A., Julia Hobbs Speech Pathology, Inc. Aaron Tanner, M.S., Children's Hospital Los Angeles Barbara Moore, M.A., Speech Pathology Associates

Assessing and planning treatment for patients having cleft palate, craniofacial anomalies and/or resonance-based disorders can be challenging as the symptoms are often unclear and atypical. Three senior clinicians from three established Cleft/Craniofacial Teams in Southern California have joined forces to present an informative and practical overview for managing these patients. Case presentations along with differential diagnosis and planning discussions will provide the clinician with the tools necessary to manage these challenging patients.

INSTRUCTIONAL LEVEL: Beginner

Evaluation Challenges and Implications for Therapy

AUTHOR: David W. Hammer, M.A., Childhood Apraxia of Speech

Childhood apraxia of speech continues to be a challenging diagnosis to make. This presentation will focus on an overview of evaluation considerations and how they relate to therapy decision-making. Videos of children of various ages will be shown to highlight the range from suspected CAS to severe motor planning struggles. Differential diagnosis and challenging co-morbid conditions will be discussed. Informal and formal evaluation tools will be outlined. Suggestions for how to talk with parents about the diagnosis will be provided.

INSTRUCTIONAL LEVEL: Intermediate
SC 6 | 8:30-11:30 | Room 102

**Nucleus Candidacy and Technology for Schools and Practical Resource Applications**

**AUTHORS:** Kimberli Davenport, DrPH, Cochlear Americas  
Rachel Tempesta, M.S., Cochlear Americas

Children with significant hearing loss entering school need appropriate access to sound to maximize listening, spoken language development, and learning. This course provides information on cochlear implant candidacy giving special attention to children who may have progressive hearing loss or who are not receiving sufficient benefit from hearing aids, most recent technology updates including features most beneficial to school age children, and resources for professionals to help students achieve their language development and educational goals.

**INSTRUCTIONAL LEVEL:** Beginner

SC 7 | 8:30-11:30 | Ballroom A

**The Time is Now: Early Identification and Intervention Until Everyone Can Read**

**AUTHORS:** Lisa Sandoval, M.S., Dynamic Therapy Solutions  
Alisha Magilei-Noterman, B.A., Dynamic Therapy Solutions

Join us as we explore our reading journey using a state-of-the-art interactive dynamic speech-language-reading screening paired with an Orton-Gillingham based multisensory reading program. Our path led us to dramatically make change with students and teachers in a low socioeconomic school district. Using best practice techniques, we were able to train the teachers how to effectively identify struggling readers, provide whole class and small group instruction, and significantly improve student’s reading abilities.

**INSTRUCTIONAL LEVEL:** Beginner

SC 32 | 8:30-11:30 | Room 211

**Keeping it Legal: AAC Services in the Educational Setting**

**AUTHORS:** Mollie Mindel, M.S., The Speech Pathology Group  
Jenna Williams, M.S., The Speech Pathology Group

SLPs often face entrenched ideas, misinformation, and unanswered questions when attempting to serve students that require AAC. Competing demands from outside sources and the district can feel like no-win pressure. This presentation will allow SLPs to feel confident that they are providing legally defensible AAC services and receive answers to many thorny questions by drawing guidance from ASHA, IDEA legal requirements, and current State Rules & Regulations. Keeping our AAC services legal and low-pressure!

**INSTRUCTIONAL LEVEL:** Intermediate

**MS 63 | 10:30-Noon | Room 105**

**Closing the Gap: Evaluation and Management of Unilateral Vocal Fold Paralysis**

**AUTHORS:** Sarah Schneider, M.S., University of California, San Francisco  
Clark Rosen, M.D., University of California, San Francisco

Patients with vocal fold paralysis (VFP) present after iatrogenic or traumatic injury or idiopathic cause. While nerve recovery occurs up to one year after injury, patients do not have to wait for treatment. A laryngologist and voice specialized speech pathologist will highlight an interdisciplinary approach to evaluation and management of patients with VFP through didactic lecture and case study. Upon completion, learners should have clear framework for evaluation, management, decision-making and expected outcomes/limitations of treatment.

**INSTRUCTIONAL LEVEL:** Intermediate

**MS 9 | 10:30-Noon | Ballroom G**

**What’s our Piece? Navigating Parents Through the Special Needs Puzzle**

**AUTHOR:** Jody Stratton, M.A., University of Redlands/University of the Pacific

SLPs tend to live inside their professional bubble. Participants will learn how to help parents navigate the special needs system focusing on the whole child. They will learn how to ask parents tough questions and how to answer them. Tools are provided for use with parents while educating them in all developmental domains. Funding options will be reviewed to educate clinicians when making referrals. Clinicians will learn to empower parents to get the job done!

**INSTRUCTIONAL LEVEL:** Beginner

**MS 10 | 10:30-Noon | Room 103**

**Save Lives! Better Chewing Prevents Choking in Children and Adults**

**AUTHORS:** Licia Coceani Paskay, M.S., Private Practice  
Nicole Archambault Besson, Ed.S., Private Practice

According to the US National Safety Council, choking is the 4th leading cause of unintentional death. The UK Office for National Statistics reported that 85% of choking deaths were caused by food and about 91% of all choking deaths were adults over 45 years of age. Otherwise healthy people still choke on items that require chewing or sticky foods requiring salivation. Through education and appropriate therapy, SLPs can help prevent choking.

**INSTRUCTIONAL LEVEL:** Beginner
**Got R Problems? A Phonemic Approach to R Remediation**

Author: Christine Ristuccia, M.S., University of Redlands

Frustrated with treating /r/ disorders? This course offers a new and refreshing approach to evaluate and treat the most difficult of sounds. Backed with extensive research and field testing, a complete phonemic approach to evaluating and treating /r/ is presented based on the 32 different types of /r/.

**INSTRUCTIONAL LEVEL:** Intermediate

---

**The School-Based SLP’s Role in Reading: A Kinesthetic, Visual Approach to Decoding**

Author: Smitha Chandrabose, M.S., Los Angeles Unified School District

This course defines a narrow role that the school Speech Pathologist can perform in dyslexia treatment. Utilizing knowledge of the International Phonetic Alphabet chart, participants will: a). identify students who may benefit from a linguistic approach after traditional approaches to sound decoding are unsuccessful b). use the American Sign Language alphabet to provide visual and kinesthetic cues for sound production and c) create articulation goals that conform with Common Core literacy state standards.

**INSTRUCTIONAL LEVEL:** Beginner

---

**Vocal Function Exercises (VFEs): How can These Improve Trained Singers’ Vocal Quality?**

Authors: Maelyn De Fede, B.A., California State University, Fresno
Fran Pomaville, Ph.D., California State University, Fresno

Dr. Stemple’s Vocal Function Exercises (VFEs) have been considered an effective treatment technique for voice disordered clients. Minimal research has been completed with non-disordered clients and even less with trained singers. This presentation will describe findings from a recent research study completed at CSU Fresno on the effectiveness of the VFEs in healthy male trained singers. Participants will have the opportunity to learn how to properly produce and implement the VFEs.

**INSTRUCTIONAL LEVEL:** Beginner

---

**They're Kind of Verbal**

Author: Janet Dodd, SLPD, Los Alamitos Unified School District

Students who have learned scripts and readily imitate (echolalia) are often described as being verbal when in application or functionality they are not. This presentation will discuss and demonstrate how evidence-based practices borrowed from interventions for speech-sound disorders, autism, and AAC can be “layered” to customize an intervention to meet the needs of these children. Intervention for these children should not be viewed as a single approach but a layering of evidence-based techniques and strategies.

**INSTRUCTIONAL LEVEL:** Intermediate

---

**Adventures in Leadership: Experiences of a CSHA Leadership Academy Learning Team**

Authors: Marcy Fox, SLPD, Whittier Area Cooperative Special Education Program
Leann Schouten, ClinScD, Jump and Schout
Caitlin Francis, M.S., Irvine Unified School District
Hilary Serota, M.S., Long Beach Unified School District
Emily Ppee Yi, M.S., Long Beach Unified School District
Laura Isaacson, M.S., Santee Schools

CSHA has launched a Leadership Academy for its professional members to develop their leadership skills, network throughout the state, and provide an opportunity to volunteer for their profession. Members of this first cohort will define areas of personal and professional growth gained from participation in and delving into elements of the Leadership Academy, provide explanations of individual projects and share results of a group-generated Likert scale specifying how they are using the skills and training.

**CAS: Assessment, Planning, and Integration of Principles of Motor Learning**

Authors: Denise Santos Ford, M.S., Speech Therapy Marin, Inc.
Lisa Klein, M.S.

Treatment of childhood apraxia of speech requires knowledge for differential diagnosis, selection of targets and integration of the principles of motor learning. Walk through these various steps with real case studies. Learn how to identify this low incidence speech sound disorder and how provide appropriate, evidence-based treatment. Participants will be exposed to an assessment and treatment strategies for children with (suspected) childhood apraxia of speech.

200 by Two: A CSHA-Developed Resource on Early Intervention

**AUTHORS:** Deborah Ross-Swain, Ed.D., The Swain Center  
Audra Elliott, M.A., Communication Works  
Stacy Frauwirth, M.S., Academic Therapy Publications

SLPs working with the birth to three population are increasingly concerned about “late talkers” who may not be referred for assessment and intervention because their delays are “typical.” CSHA’s Early Intervention committee, funded by an ASHA grant, has produced an informational video for healthcare professionals designed to educate EI services in order to minimize problems associated with communication delays. This session will introduce the video, describe the process and uses of the video.

The Perils of Using Untrained Interpreters in Clinical Environments

**AUTHORS:** Edward Garcia, M.S., California State University, Long Beach  
Alaine Ocampo, Ph.D., California State University, Long Beach

The purpose of this presentation is to share the results from a survey administered to individuals who reported to have served as Spanish interpreters in a clinical setting. Implications related to the importance of understanding the limitations inherent to translating clinical terms, and the advantages of having alternative (less complex) and “more easily” translated words and phrases available to the clinician will be shared.

Identifying and Managing High-Risk Aspiration Patients in Acute Care: Assessment and Intervention

**AUTHORS:** Sandra Deane, M.S., Stanford Health Care  
Madison Fox, M.S., Stanford Health Care  
Kate Hayes, M.S., Stanford Health Care

This presentation will provide an understanding of assessment and management of dysphagia in complex, high-risk patient populations in acute care. Emphasis will be placed on the use of objective assessment tools and evidence-based intervention approaches. Videos and case studies will be presented to illustrate clinical-decision making considerations. Populations covered include lung and multi-organ transplant, COPD, tracheostomy, cardiac surgery, neurological disorders (e.g., stroke, dementia, Parkinson’s), as well as patients following extended intubation.

The Social/Pragmatic Impact of Auditory Processing Disorders: Evaluation and Management

**AUTHORS:** Donna Geffner, Ph.D., Donna Geffner and Associates  
Deborah Ross-Swain, Ed.D., The Swain Center

An audiologist and speech-language pathologist will discuss the high prevalence of anxiety disorders, social-emotional and pragmatic language disorders seen in youngsters with auditory processing disorders. Prevalence and behavioral signs of social/pragmatic disorders, co-morbid emotional factors seen in this population will be discussed, along with its impact on emotional well-being. Evaluation and specific tests to measure social-pragmatic issues will be presented along with guidance for treatment and management. Various therapeutic approaches will be mentioned.

That's SO Annoying! Helping Students With Social Learning Challenges Face Frustration

**AUTHOR:** Anna Vagin, Ph.D., Private Practice

Students with social learning challenges often find peers (and adults) annoying. And, with varying frequency, many peers (and adults) in their home and school environments find them annoying. We will explore this common emotion, discussing both its positive role in social relationships as well as how it can serve as a trigger for big reactions and resentments. You will leave with YouTube video recommendations and structured activities to utilize in your individual or group sessions.

Improve Adolescent Writing Skills and Confidence: Teach Access to Pertinent Cognitive-linguistic Skills

**AUTHOR:** Maria Davis-Perkins, Ph.D., Claremont Graduate University/3D Educational Solutions

Students with language delays have difficulty with written expression. Yet, students need to write to show learning in school. Children build semantic, syntactic, and pragmatic networks via everyday interactions (Paul & Norbury, 2012). This presentation discusses the research, results, and techniques of a pilot program that taught students how to access underlying networks that they possess and improve their written expression as well as confidence in their ability to write.

Individualizing Voice and Communication Training for Transgender and Non-Binary People

Authors: Judith Jewett, M.A., Jewett and Associates, Inc.
Wendy Vastine, M.A., Jewett and Associates, Transformative Voice
May Teget, Student, Sacramento City College

Voice and communication training for transgender and non-binary people is a highly individual process. It extends beyond the areas such as pitch, resonance, intonation to a cultivation of a voice that reflects a genuine sense of self. Creating a safe space for what can be a highly vulnerable journey requires a nuanced understanding of the needs and ever-evolving culture of the community. Treatment plans that allow for flexible incorporation of all these facets will be discussed.

A Multi-Dimensional Approach to Narrative Push-In Intervention: The Macro to the Micro

AUTHORS: Margaret Vento-Wilson, Ph.D., Cypress School District
          Rachel Pyon, M.A., Cypress School District

This seminar describes a novel narrative-based intervention that SLPs can provide in the most naturalistic setting at a school campus, the classroom itself. This evidence-based intervention supports development of narrative skills with structured weekly lessons that are delivered in classrooms. This intervention supports students’ transitions from descriptions of the “here and now” to the “there and then,” as well from narrative to expository structures. A further benefit is the impact on managing high caseload numbers.

Determining Pediatric Speaking Valve Candidacy: The Relevance of Transtracheal Pressure Manometry

AUTHOR: Kimberly Morris, M.S., Purdue University

SLPs are essential in optimizing care for children with tracheostomies. Transtracheal pressure manometry (TTP) is an under-utilized metric that facilitates assessment of speaking valve candidacy. Determining candidacy requires an array of clinical skills, including assessment of oropharyngeal dysphagia, cognitive communication, and motor speech disorders. This seminar describes and demonstrates the assessment and treatment for establishing tolerance of bias-closed, no leak speaking valve and addresses the rationale and procedures for using TTP to improve clinical care.

6. Perspectives of Non-Specialized Voice Speech-Language Pathologists on Discharge Criteria

AUTHORS: Laurel Directo, B.A., California State University, Long Beach
Leila Regio, Student, California State University, Los Angeles
Lauren Timmons, M.S., University of Southern California, Voice Center
Maria Eugenia Castro, M.S., University of Southern California, Voice Center
Edie Hapner, Ph.D., University of Southern California, Voice Center

Determining criteria important to voice therapy discharge has been the aim of recent surveys of voice specialized SLPs, though there remains a lack of consensus on both dose and factors important to determining when a patient should be discharged from therapy. This study examined discharge criteria important to non-voice specialized SLPs. Results indicated the need to develop guidelines regarding both dosage and discharge criteria for voice therapy as a benchmark tool for the clinician.

### Achieving Functional Outcomes After TBI: Speech-Language Pathologists as Cognitive Coaches, Part One

**AUTHOR:** Mary Kennedy, Ph.D., Chapman University

Many adolescents and adults who make good recovery after TBI have the potential to return successfully to the community, work and college. Part one of this two-part workshop focuses on: 1) how to assess survivors' cognitive and communication abilities so as to determine their functional capability and personal goals, and; 2) describe the evidence that supports a cognitive coaching intervention model for SLPs to utilize with these kinds of survivors.

**INSTRUCTIONAL LEVEL:** Intermediate

### Early Helps

**AUTHOR:** Ken Biele, Ph.D., University of Northern Iowa

This presentation discusses speech treatment with infants and toddlers. Topic areas include, what puzzle must an infant solve to acquire speech? Do electronic teachers help a child learn? Why work on speech if a child has broader medical and developmental needs? Is waiting to intervene bad for a baby's brain? What—very specifically—can a clinician do to promote speech development in children so young?

**INSTRUCTIONAL LEVEL:** Intermediate

### Therapy Strategies That Make a Difference

**AUTHOR:** David W. Hammer, M.A.

This hands-on, practical, therapy-rich presentation will focus on strategies for therapists that facilitate verbal communication for children with apraxia of speech. A multi-sensory approach to therapy will be detailed, with a wide range of therapy ideas described that are appropriate for both individual and group treatment. Extensive videos of children in therapy will be used to highlight strategies, and suggestions will be provided for carryover outside of the therapy setting.

**INSTRUCTIONAL LEVEL:** Intermediate

### Mindfulness, Acceptance and Commitment Therapy, and the Brain: A Journey With Stuttering

**AUTHORS:** Scott Palasik, Ph.D., University of Akron
Jaime Michise, M.S., Private Practice/University of North Texas/Nagoya International School

Acceptance and Commitment Therapy (ACT) is a mindfulness-based psychotherapy approach that assists clients in living a valued-based life through the development of psychological flexibility. During this experiential training, presenters will guide attendees through exercises to help them better understand each core principle of ACT; and provide clinical examples using ACT with individuals who stutter. Presenters will also summarize some of the current neurological research that exists as it related to ACT and mindfulness practices.

**INSTRUCTIONAL LEVEL:** Beginner

### Challenging Neurological Cases: Round 6

**AUTHOR:** Betty McMicken, Ph.D., Chapman University

Among other unusual clients, round 6 will feature a rare case of sudden onset of word deafness with unintelligible fluent speech, intact hearing/sound perception and intact ability of reading and writing. Additionally, we will present a case of complete speech/language recovery in an 18-year-old post brain tumor removal and post op characteristics of total body hypokinesis. These cases, along with others as time permits, will demonstrate the importance of immediate SLP diagnosis/treatment.

### “The Winding Road of Professionals: Working with Dementia Patients and Their Families”

**AUTHOR:** Sheila Levy-Craven, M.A., California State University, Dominguez Hills

Working with patients and families in the early stages of Dementia is important to maintain communication as the disease progresses. This workshop provides the SLP with an overview of symptoms of Dementia of the Alzheimer’s Type. Participants will have the opportunity to understand the effects of Alzheimer’s disease on patients and their family over time. Information will include ideas for expanding the techniques for the SLP to increase and maintain communication and cognitive involvement longer.

**INSTRUCTIONAL LEVEL:** Intermediate
Evaluation and Eligibility Determination for English Learners

AUTHOR: Maret Wilson Walker, M.A., The Speech Pathology Group

Student demographics in California call us to be leaders in appropriate evaluation and eligibility determination of English Learners. Participants in this presentation will review typical vs. atypical indicators of bilingual language development and learn how bilingual linguistic background might affect test outcomes and lead to disproportionate identification. Legal obligations regarding bilingual assessment and evaluation interpretation will be discussed, and a variety of alternative evaluation methods will be outlined.

An Efficient Hearing Screening Protocol for Your SLP Caseload: Why and How

AUTHORS: Sally Parkinen, M.A., Chapman University
          Deanna Hughes, Ph.D., Chapman University
          Amanda Kelly, B.S., Chapman University
          Neli Ghorbani, B.A., Chapman University
          Gilbert Herer, Ph.D., Chapman University
          Judy Montgomery, Ph.D., Chapman University

This presentation will provide participants with an efficient hearing screening protocol for speech-language pathologists to use with their individual caseloads. Additional interactive practice and strategies will be presented to aid in the completion of successful hearing screenings in individuals with developmental disabilities as well as the general population. Undiagnosed and untreated hearing loss is a critical health issue and dramatically impacts an individual’s quality of life and everyday communication across settings.

Autism and Apraxia: Assessment & Treatment from a PROMPT Perspective

AUTHOR: Amy Clark, M.S., Children's Hospitals and Clinics of Minnesota

PROMPT is an acronym for Prompts for Restructuring Oral Muscular Phonetic Targets (PROMPT). PROMPT trained SLPs assess and treat individuals holistically by approaching communication as an interaction of the physical-sensory, cognitive-linguistic and social-emotional domain within the Conceptual Framework. This presentation will examine how children with autism and apraxia are assessed and treated from a PROMPT perspective.

**ABCs of Advocacy and Leadership: What Every Student Needs to Know**

**AUTHORS:** Michelle D’Mello, B.A., California State University, Fullerton  
Amanda Perrotti, M.A., California State University, Los Angeles  
Robert McKinney, M.A., SDSU, Sweetwater Union High School District

Leadership and Advocacy are the foundation our state and national associations are built upon; however, there is a growing need for student and young professional leaders. During this interactive presentation, students and professional representatives from the state and national associations will discuss the importance of developing student leadership and advocacy from the grassroots to national level. Students developing these skills are equipped to build clinical expertise, advocate for their clients, and participate in professional associations.

**The Influence of Balance on Oral-Motor Control for Speech**

**AUTHOR:** Fran Redstone, Ph.D.

This study investigated balance in typical adults while performing diadochokinesis in 2 positions; standing on the floor and on a balance disk. The difficult balance task should interfere with speech motor control. Results indicate that while participants compensated for speech rate while having to maintain balance, the number of syllables was fewer in the balance-challenging position. Analysis also indicated that past speech therapy was related to poorer balance. Implications for treatment and future research.

**Do Minimally Verbal Children with Autism have Childhood Apraxia of Speech?**

**AUTHORS:** Julissa Sandoval, B.A., California State University, Fullerton  
HyeKyeung Seung, Ph.D., California State University, Fullerton

Shriberg et al. (2011) have hypothesized if Childhood Apraxia of Speech (CAS) is an underlying cause for minimally verbal children with autism. However, there is minimal research and evidence that justifies this hypothesis. This poster session seeks to demonstrate a systematic literature review related to CAS diagnosis and treatment, diagnosis and treatment of oro-motor impairments in children with autism, and lastly, to raise awareness of the need of an effective treatment for this population.

**An Exploratory Analysis of Visual Relatedness in Bilingual Aphasia**

**AUTHORS:** Lesley Peng, Student, California State University, San Francisco  
Mitchell Perck, Student, California State University, San Francisco  
Teresa Gray, Ph.D., California State University, San Francisco

The aim of this exploratory analysis was to examine non-linguistic codeswitching in bilingual aphasia. Participants included Spanish-English healthy bilingual adults and Spanish-English bilingual adults with aphasia. Participants completed a non-linguistic codeswitching task requiring individuals to indicate whether groups of tri-shapes categorized within squares or circles were related or unrelated. Both groups exhibited significant effects of relatedness interference; however, this occurred within different contexts, suggesting differences between how patient populations and healthy populations control nonlinguistic information.

**Observing Caregiver-Child Interactions: Experiences Developing and Conducting Research as Undergraduates**

**AUTHORS:** Philip Salomon, B.A., California State University, Los Angeles
Vanessa Aguilar, B.A., California State University, Los Angeles
Mary Kubalanza, Ph.D., California State University, Los Angeles

This study aimed to explore communicative interactions between caregivers and children with developmental delays. Two caregiver-child dyads were observed using qualitative case study methodology. Direct Observations were conducted at a family-focused, special education early learning center. At least two undergraduate students independently composed field notes during each session. Interpretation of observational data and analyses of emergent themes will be presented. Additionally, challenges and benefits of developing and conducting research as undergraduate students will be discussed.

**Accessibility of Children’s Books Among Mono- and Multilingual Spanish Speaking Parents**

**AUTHORS:** Brittany Hernandez, B.S., California State University, Sacramento
Tonia Davis, Ph.D., California State University, Sacramento

Shared storybook reading can improve literacy outcomes when implemented by parents as well as professionals. To participate in shared storybook reading, books must be accessible to the families. 101 parents who used WIC resources were surveyed on reading activities and accessibility. Half of these parents (n=51) spoke Spanish as a primary language. The current study investigates the effect of language status on reading activities and particularly on accessibility of children’s books.

Parental Perspective on Children’s Play and its Effect on Language Development

AUTHORS: Sara Moon-Seo, Ph.D., Rogers State University, Claremore
Namhee Kim, Ph.D., California Baptist University, Riverside

This study explores how parents’ perspective on children’s play is related to the vocabulary development of 8 typically-developing children between 1 and 3 years. Each parent participated in a face-to-face and semi-structured interview and completed a child vocabulary checklist. Results reveal common and individual themes in defining play, and how their perspectives account for children’s vocabulary development. Possible clinical implications of use of play as a medium to support children’s language learning are discussed.

Effects of Clinician Speech Rate on Conversations with Preschool-Age Boys Who Stutter

AUTHOR: Lisa LaSalle, Ph.D., University of Redlands

Fluency facilitation occurs in preschoolers who stutter when clinicians speak significantly slower than their baseline speech rate. However, the mechanisms of slow rate fluency facilitation are not well known. To this end, clinician-child conversations of eight preschool-age boys who stutter (M age = 49 mos, Range: 37 to 72 mos) were investigated, when the clinician slowed and sped up her speech rate. Analyses of the conversational samples included assertiveness vs. responsiveness, NDW, MLU-M and phonology.

Early Intervention: Redefining the Natural Environment and Coaching Parents

AUTHOR: Karyn Searcey, M.A., TERI Crimson Center for Speech & Language/ California State University, San Diego

Federal and state agencies have specific guidelines for early intervention (EI) services. Speech-Language Pathologists (SLPs) who serve this population are well-versed in content knowledge and implementation of services. This seminar provides an overview of policy, and implications for best practice in terms of place of service and effective strategies to coach parents. We will redefine “natural environments” and customize access to services for all families. Video examples will illustrate strategies of simulating the natural environment.

### Speech and Swallowing Facilitation in the Tracheostomized Patient

**AUTHOR:** Courtney Young, M.A., Community Regional Medical Center

The purpose of this session is to introduce a newer clinician to working with patients with tracheostomy tubes. It will include an overview of respiratory anatomy and physiology, components of tracheostomy tubes, different speaking/swallowing valves, benefits and use of valves. An overview of how to complete valve trials will be provided, including how to progress patients towards decannulation and appropriate timing of dysphagia and cognitive evaluations, as indicated.

**INSTRUCTIONAL LEVEL:** Beginner

### Use of FEES in Acute Care Setting

**AUTHORS:** Susie Nam, M.S., Keck Medical Center of USC
Melody Ouyoung, M.S., Keck Medical Center of USC
Brenda Villegas, M.S., Keck Medical Center of USC
Utam Sinha, M.D., Keck Medical Center of USC

VFSS and FEES are equally effective in distinguishing between penetration and aspiration, detecting aspiration, managing patients with dysphagia, and producing patient outcomes. Despite these similarities and the unique benefits of FEES, VFSS remains the gold standard in the acute setting. Through discussion of clinical case studies, this presentation will focus on the potential of FEES as the primary instrumental assessment in the acute setting.

**INSTRUCTIONAL LEVEL:** Intermediate

### Mentorship in Pediatric Feeding and Swallowing

**AUTHORS:** Jennifer D’Attilio, M.S., Central Coast Language and Learning Center
Courtney Long, M.Ed., Central Coast Language and Learning Center/Laurie Ross Brennan and Associates

Pediatric feeding and swallowing have become an important sub-specialty of the industry, and training and mentorship programs are not in-line with industry needs. Mentors and Mentees require guidelines when engaging in the mentorship process to ensure training and expertise in the NICU, private practice, early intervention programs and school settings. This course will outline the mentorship program used for externs, clinical fellows and speech pathologists wanting to enter into pediatric feeding and swallowing.

Ethics: How SLPAs can Avoid Sticky Situations

AUTHORS:  
Leann Schouten, ClinScD, Jump and Schout Therapy  
Danielle Sison, Student, Jump and Schout Therapy

What can a SLPA do? When an SLP ask a SLPA to perform a job that is not in their scope of practice, what should the SLPA do? Does the SLP truly understand the role of SLPA? In this presentation, the ethical concerns from SLPAs will be addressed and scenarios reviewed to determine what they should do to protect themselves and educate team members around them.

When You Pick up a Pen, You Stop the Interaction

AUTHORS: Jill Duthie, Ph.D., University of the Pacific
           Nicholas Brock, M.S., University of the Pacific
           Lisa Chatter, M.A., Los Alamitos Unified School District

The traditional manner of tracking treatment progress by taking data and reporting percent accuracy doesn’t authentically measure many of our therapeutic goals. It interrupts the dynamic social interaction and confuses caregivers. This is an evidenced-based approach that addresses this challenge. A university training pilot study with clients who have severe communication delays, and a supervisor’s and practicing clinician’s experiences with middle school students with mild-moderate autism will be presented. Target audience: clinicians, supervisors, students, SLPAs.

The Intersection of SLP Perceptions and Practices and Aided AAC Users’ Language

AUTHOR: Margaret Vento-Wilson, Ph.D., Chapman University

This presentation reviews the results of a dissertation analyzing the intersection of speech-language pathologists’ beliefs, perceptions, and practices and the language acquisition and development of emerging aided communicators. This dissertation employed a survey methodology and targeted elementary-school based SLPs with aided emerging communicators on their caseloads. The central focus of this dissertation was to identify latent constructs that may be influencing linguistic outcomes for these emerging aided communicators.

Evidence Based Practices (EBP): Naturalistic Interventions - An Overview

AUTHOR: Pamela Flores, MCD, Escondido Union School District/California State University, San Marcos

Naturalistic interventions (NI) are behaviorally-based practices including environmental arrangement, interaction techniques, and strategies. NI can be used to help learners to communicate or to become more social, across a range of persons, settings/environments, and throughout the day, increasing the probability of generalization of target skills. Naturalistic interventions can be used with learners who are prelinguistic or who communicate with words. NI interaction techniques to be discussed: Modeling Technique, Mand-Model Procedure, Modified Time Delay, Incidental Teaching.

Current Essential Knowledge in Audiology for the Speech-Language Pathologist

AUTHORS: Edward Garcia, M.S., California State University, Long Beach
Terrence Yuen, B.A., A.T. Still University of Health Sciences

Technological advances have led to hearing aids that translate foreign languages, send text messages, and even detect falls. Assessment using non-behavioral instrumentation that evaluates hearing by measuring loud tones emitted from the inner ear. Studies linking hearing loss and cognitive decline, and the fact that 50% of deaf children passed their newborn hearing screenings, have triggered significant changes in audiology. These developments emphasize the importance of understanding current audiological practices by other health professionals.

Prescription for Play: Playtime Pearls for Optimizing Airway and Oral Functions

AUTHORS: Nicole Archambault Besson, Ed.S., Minds In Motion
Hila Robbins, M.D., DMD, INC.

For children, play is a vital part of development. Research demonstrates that beyond pleasure, the purpose of active play is to provide stimulation for proper perceptual, sensorimotor and neural development, executive and regulatory functions, language, physical and social development. With children's increasingly sedentary lifestyles and lack of active outdoor play, children's airway and oral functions are compromised. Through research and case studies, we will introduce how active play can prevent airway and oral dysfunction.

Speech Sound Acquisition in Korean-English Bilingual Children

AUTHORS: Minjung Kim, Ph.D., California State University, Sacramento
Joyce Lee, B.A., California State University, Los Angeles
Esther Joo, B.A., California State University, Fullerton
Jessica Shin, B.A., California State University, Fullerton
Na Young Shin, B.A., California State University, Northridge

This study examines the speech sound acquisition of typically developing Korean-English bilingual children aged 4 and 5 years. Speech data include single word productions of Korean and English. Data analyses include the phonetic inventory, error patterns, and percentage of consonants correct (PCC). Results from eight Korean-English bilingual children reveal the presence of cross-linguistic interference in the acquisition of English speech sounds.

A Comparison of Human Patient Simulators for Nasendoscopy Training With Graduate Students

AUTHOR: Teri Clemons, M.S., Biola University

Research has proven that simulation is an effective form of instruction, however there are still unanswered questions about how simulation tasks need to be modified to be the most efficient and useful. This includes a need to determine if different levels of simulation fidelity impact student learning. This study used human patient simulators to teach graduate students flexible nasendoscopy and examined whether the level of fidelity of the simulator had an impact on student learning.

ASL Phonological Awareness and English Reading Skills: Examining New Relationships

AUTHOR: Keith Wolgemuth, Ph.D., Loma Linda University

The present study was conducted to replicate previously established findings that deaf children exposed to American Sign Language (ASL) earlier in life, have greater English literacy proficiency than deaf children who acquired ASL later in life. School-age subjects underwent ASL phonological awareness and the results were compared to two English reading assessments. Deaf children with stronger ASL skills tend to have higher English reading skills.

All Referrals Are Equal but Some Are More Equal Than Others

AUTHOR: Paul Bishop, M.A., Irvine Unified School District

Managing referrals for students to be evaluated for speech and language pathology services is a process outlined in the state education code and by individual district policy. Speech pathologists who practice in the school setting often face a large amount of referrals at the start of the school year. This presentation outlines how the speech pathologists in one southern California school district report prioritizing referrals. Results and implications of the survey are discussed.

Bridging the Diagnostic Gap Between Underserved and Served Communities: A Literature Review

AUTHOR: Lahya Woodruff, Student, California State University, Long Beach

This mini-seminar is a literature review on the diagnostic gap of autism between ethnic minorities and Caucasian children. Research shows that Hispanic and African American children are typically diagnosed later than Caucasian children. It is important to raise clinical and community awareness. In order to assure timely diagnoses of children from all populations and cultural backgrounds, individuals should be aware of the disparities and the underlying factors of the divide.

Education Sessions

Sunday | March 17, 2019

**Treating Cleft Palate Speech**  
**AUTHOR:** Danielle DeWitt, M.S., Stanford Children’s Health

Cleft palate speech can be overwhelming to treat without the right set of tools. This seminar is designed to provide you with the “need to knows” in order to effectively treat the child with cleft palate speech. In this course you will learn how to perform low tech assessment for resonance, differentiate between compensatory speech errors and obligatory speech errors and understand the difference between typical articulation therapy and cleft palate speech therapy.

**Using Family Routines to Build Communication Skills During Early Language Intervention**  
**AUTHOR:** Toby Stephan, M.A., The Hanen Centre

Best practice supports using family routines as a context for early language intervention. This presentation will describe a strategy and planning process from It Takes Two to Talk® – The Hanen Program® for Parents, which helps parents’ structure everyday routines in ways that are motivating to the child and scaffold their participation, thereby facilitating communication skills. Videos and case studies will illustrate this facilitative use of routines with children at different stages of communication.

**INSTRUCTIONAL LEVEL:** Intermediate

**Family Caregivers and Dysphagia**  
**AUTHORS:** Brenda Capobres Villegas, M.S., University of Southern California  
Laishyang (Melody) Ouyoung, M.S., University of Southern California  
Uttam Sinha, M.D., University of Southern California

Management of dysphagia goes beyond the healthcare team. Family members are expected to provide care and support with managing dysphagia at home. This presentation will review current literature of caregiver burden and the role of the healthcare team especially the speech-language pathologist. Discussion will take place regarding guidelines to educate, train, and support the family caregivers caring for patients with dysphagia.

**INSTRUCTIONAL LEVEL:** Intermediate

**Beyond Standardized Assessment - Performance Based Assessments and Educational Standards (CCSS)**  
**AUTHORS:** Sharlee Mosburg-Michael, M.A., San Diego Unified School District  
Sally Christian, M.S., San Diego Unified School District  
Jena McVater, M.A., San Diego Unified School District

This session will focus on how to collect assessment information which informs development of goals and service delivery that support student access to the general education curriculum and standards. You’ll learn how to develop performance-based assessment tasks and protocols, to write language goals based on CCSS and design intervention.

**INSTRUCTIONAL LEVEL:** Intermediate

**Teaching Scanning Through Music: An Effective Strategy**  
**AUTHOR:** Dana Arce, M.A., California State University, San Jose

This presentation will highlight the use of music and sound as a strategy to teach auditory scanning to new AAC users. Students who access AAC through scanning have a steep hill to climb in order to learn where vocabulary is stored within a device. This presentation will share the thought and reason behind this strategy and how it has been applied to support multiple users in learning scanning patterns to navigate their AAC systems.

**INSTRUCTIONAL LEVEL:** Intermediate

**Implementation of Pragmatic Language Intervention in Natural Settings**  
**AUTHOR:** Uduak Osom, M.A., Innovative Therapy Services, Santa Clara

There is limited evidence demonstrating the long-term benefits of pragmatic language intervention for school age children in naturalistic settings. However, naturalistic pragmatic language intervention is widely supported within the field of speech pathology. This presentation will compare current research with formal structured pragmatic language intervention versus naturalistic pragmatic language intervention. It will provide current research on evidence based naturalistic pragmatic language intervention approaches and the long-term benefits of using naturalistic approaches.

Refocusing the Learning Lens: Incorporating IPE and Standardized Patients Into Graduate Programs

AUTHOR: Danielle Urbina, B.A., California State University, Fullerton  
Sarah Green, B.A., California State University, Fullerton  
Stephanie Abbott, B.A., California State University, Fullerton  
Leslie Chen, B.A., California State University, Fullerton  
Joshua Stockton, B.A., California State University, Fullerton  
Barbara Doyer, MSN RN, California State University, Fullerton  
Phil Weir-Mayta, Ph.D., California State University, Fullerton

There is a growing need for Inter-Professional Education (IPE) and Simulated Patient (SP) use in speech-language pathology graduate programs. Using a pretest-posttest experimental design, nursing and SLP students were combined and participated in three IPE-SP experiences within a high-tech hospital simulation center using human patient simulators. Student perceptions of confidence, preparedness, knowledge, clinical competence, and anxiety levels will be presented. Course instructors plus SLP and nursing students will be present to share their experience.

Successful Transition From Autism Specific Classroom to GenEd – Is it Possible?

AUTHOR: Cheryl Cates, M.S., Santa Ana Unified School District

This presentation highlights the implementation of a strategic transition program designed to provide crucial tools to students for their success in GenEd classes. It is ideally constructed for TK and Kinder students coming from Autism Specific Preschool classes who are performing academically at or above their grade level. It is constructed to provide the scaffolding for these students to perform effectively in a GenEd class with speech and language services and possibly mild moderate services.

INSTRUCTIONAL LEVEL: Intermediate

A Program Model: Developing a Culturally Responsive Clinical Training Program

AUTHOR: Eusabia Mont, M.S., University of Maryland, College Park

Infusing cultural and linguistic diversity training into pre-service clinical education is critical to cultivating well-rounded students and future speech-language pathologists. The Cultural-Linguistic Diversity Emphasis Program (CLD-EP) at the University of Maryland, College Park prepares graduate clinicians for work with diverse populations through academic coursework, learning seminars, scholarly activities, and professional development. We provide an in-depth understanding of cultural and linguistic differences that impact access to services, assessment, family counseling and intervention across the lifespan.

Working Together to Create Communication Access: Interprofessional Tools & Strategies

AUTHOR: Nassrine Noureddine, Ed.D, California State University, Sacramento  
Darla Hagge, Ph.D., California State University, Sacramento  
Debra Brady, Ph.D., California State University, Sacramento

Today’s healthcare professionals must be skilled at successful collaborative communication, ethical practice, understanding professional roles and responsibilities and serving effectively on healthcare teams. Communication breakdowns between patients and healthcare professionals are frequently exacerbated in the presence of acquired communication disorders. This presentation will discuss interprofessional education and practice, policies related to communication access, the different presentations and severities of communication disorders, and suggestions for healthcare teams to maximize patient safety and enhance health outcomes.

INSTRUCTIONAL LEVEL: Intermediate
Treating and Managing Pediatric Dysarthria

**AUTHOR:** Ignatius Nip, Ph.D., California State University, San Diego

Pediatric motor speech disorders, including dysarthria, are understudied. This leaves many clinicians confused about where to start with assessment, treatment, and management for children with dysarthria. This session will provide clinicians with tools, techniques, and updates to evidence-based practice with this population.

**INSTRUCTIONAL LEVEL:** Intermediate

Literacy and the Role of the School Based SLP

**AUTHOR:** Jane Krider, M.S., The Speech Pathology Group

School based SLPs continue to struggle with increasing demands and larger caseloads. Current trends reveal that SLPs typically consider reading and writing the responsibility of Teachers and Resource Specialists. ASHA’s 2001 position statement indicates “SLPs play a critical and direct role in the development of literacy for children and adolescents with communication disorders.” Literacy and language development information will be presented. Evidence based literacy interventions with “ready to use” lessons and materials will be provided.

**INSTRUCTIONAL LEVEL:** Intermediate

Demystifying Voice Therapy: A Case-Based Interactive Seminar

**AUTHOR:** Lauren Timmons, M.S., University of Southern California, Voice Center
Edie Hapner, Ph.D., University of Southern California, Voice Center
Maria Eugenia Castro, M.S., University of Southern California, Voice Center

This case-based presentation will guide clinicians through the development and implementation of voice treatment protocols for a variety of voice disorders in adults. Participants will review patient history, voice recordings, laryngeal imaging examinations, and physician’s impressions using an interactive style to develop clinical hypotheses and physiologically based functional therapy plans. Review of the physiological reasons for a variety of therapy methods will be presented.

**INSTRUCTIONAL LEVEL:** Intermediate

How to Improve Assessment Accuracy & Provide Better Service to CLD Population

**AUTHOR:** Helen Li, M.A., El Monte City School District

With the many languages spoken by our students and limited resources in terms of bilingual developmental norms and assessments, even multilingual SLPs are faced with the challenge of appropriately assessing, identifying, and working with the CLD population. The aim of this presentation is to share our experience and resources we have gathered in order to prevent overidentification and provide culturally sensitive services.

**INSTRUCTIONAL LEVEL:** Intermediate

Effects of Seat Surface Position on Breath Support in Children

**AUTHOR:** Leann Schouten, SLPD, Jump and Schout Therapy

This presentation will discuss the use of a Swiss ball for increasing the MPT, decreasing fatigue, and increasing attention in children with a diagnosis of mild to moderate hypotonia. A review of respiration and seat surface methods will be discussed. Participants will gain an understanding of positioning for increased respiration for speech and vocal production and how a client may experience a positive change in attention and fatigue over a 30-minute period.

**INSTRUCTIONAL LEVEL:** Intermediate

Learn from Yourself -- Video Self Modeling is Powerful Evidence Based Strategy

**AUTHOR:** Lois Brady, M.S., iTherapy, LLC

Video modeling is an evidence-based teaching strategy for people on the autism spectrum; its primary function is to show someone how he/she looks while correctly executing a task. Video modeling teaches a variety of skills -- from speech and language skills to reading (Buggley, 2009). With today’s mobile technology capturing and/or editing videos is easier than ever. This presentation will show how to successfully use Video Self-Modeling to improve communication and almost any target skill.

Autism: Joint Attention, Symbolic Play, Brain Network Connectivity, and Earlier Intervention

**AUTHOR:** Stacey Landberg, M.S., University of Southern California-Children’s Hospital Los Angeles Leadership Education in Neurodevelopmental and Related Disabilities Fellowship Program Description (CA-LEND)

Default Mode Network (DMN) brain connectivity is impaired in individuals with ASD. Some of the many tasks requiring DMN activation include social interactions, joint attention and theory of mind. Clinical implications for SLPs who are working on joint attention and symbolic play (two core deficits of ASD) are discussed. Research-based strategies and findings are analyzed to guide evidence-based practice.

SLP in Cambodia From the Ground Up! Creating Sustainability—the Five-Year Mark

**AUTHOR:** Elizabeth Chafcouloff, M.S., Speech Therapy Cambodia

Five years ago, in Cambodia, few pediatric SLP services were available, and no services at all for adult dysphagia or speech-language impairments existed. In 2013, two new nonprofit organizations targeting speech therapy sprang up. One is OIC Cambodia; the other is Speech Therapy Cambodia. We will discuss what each of these organizations has been doing to create and sustain speech pathology programs in Cambodia—steps forward and obstacles encountered, and the collaborative relationships developed.

CONTINUING EDUCATION WORKSHOP

SUPERVISION IN THE MEDICAL SETTING
MAY 18, 2019 › 8:30-1:00 PM › STANFORD UNIVERSITY AND MEDICAL CENTER

PRESENTER: Ann Kearney, CScD, CCC-SLP, BCS-S
CES: Earn 3.5 continuing education hours!

This workshop will take one through an in-depth look at supervision within the profession of speech pathology, with special attention to the challenges specific to a medical setting. The goals of the workshop include a better understanding of communication styles, ethical considerations, and differences between supervising and mentoring. It is hoped the participant leaves the workshop with a better understanding of their supervisory goals and expectations to enhance the professional growth of their supervisees.
